Post-marketing Reports of Mortality As with other IM antipsychotics, fatalities with the use of ziprasidone IM, generally in patients with multiple confounding risk factors, have been reported. Although a casual relationship has not been established, ziprasidone IM should be used with caution. Priapism cases of priapism have been reported with antipsychotic use, including ziprasidone. This adverse reaction, as with other psychotropic drugs, did not appear to be dose-dependent and did not correlate with the duration of treatment.	Post-marketing Reports of Mortality As with other IM antipsychotics, fatalities with the use of ziprasidone IM, generally in patients with multiple confounding risk factors, have been reported. Although a casual relationship has not been established, ziprasidone IM should be used with caution.	Special warnings and precautions for use
