
Important Safety Information for Patients Receiving glofitamab 1 mg /1 mL

Patient Card

- Please carry this card with you at all times while you are receiving glofitamab.
- Show this card to any doctor involved in your care.

Information for the patient

Contact your Doctor or get emergency help **right away** if you have any of these symptoms:

- Fever (38°C or higher)
- Fast heartbeat
- Chills
- shortness of breath
- Feeling dizzy or lightheaded

Experiencing any of these symptoms could be due to **Cytokine Release Syndrome**, which requires immediate evaluation by a Doctor.

Cytokine Release Syndrome

- is a group of symptoms caused by small proteins called cytokines, released in your body during inflammation.
- may be caused by receiving glofitamab.

Information for medical team personnel

This patient has received *glofitamab* - **which may cause Cytokine Release Syndrome (CRS).**

- Evaluate the patient immediately and treat symptoms.
- **Contact the treating physician** when possible - they may need to modify the next infusion of glofitamab.
